Stand 1-3
Stand 10-12

Dacia

Dacia is a Romanian car manufacturer founded in 1966, now a subsidiary of the Renault Group. Known for its affordable, reliable, and practical vehicles, Dacia has gained popularity across Europe and beyond. The brand focuses on offering essential features without unnecessary extras, making it an ideal choice for budget-conscious drivers. Combining simplicity with smart engineering, Dacia continues to grow as a trusted automotive brand delivering mobility solutions at competitive prices.

Stand 4-9

Ford Otosan

A global automotive pioneer, Ford combines a rich legacy with modern innovation to offer versatile, high-performance vehicles. The brand emphasizes quality, sustainability, and accessible mobility worldwide. With a strong focus on technology, safety, and customer needs, Ford continues to drive progress and deliver smart mobility solutions for a changing world.

Stand 13-14

Sistec

Founded in December 1994, Sistec is today one of the leading IT&C systems and solutions integrators in Romania. We are the trusted IT partner that combines technological expertise with business understanding. Regardless of your company's size or industry, we provide integrated solutions that turn technology into the engine of your success.

Stand 15-16

Honya Europe

HONYA Europe is a leading manufacturer of printed circuit boards (PCBs) with extensive experience in the European market since 2009. We specialize in a wide range of PCBs, from single-sided to complex multilayered and flexible boards, supporting various electronic technologies. Located in Poland, our strategic position within the EU offers clients simplified customs, tax, and logistical procedures for efficient order fulfillment. We prioritize quality, ensuring every batch meets the highest standards through detailed inspections. As a Polish-Chinese consortium, we combine European quality with Chinese production efficiency, providing an exceptional price-to-quality ratio. Our clients benefit from dedicated account managers, buffer warehouses, and advanced online tools for full control over orders. Choose HONYA Europe for cutting-edge, dependable PCB solutions customized to your requirements, and benefit from our dedicated support throughout the entire order process.

Stand 17-18

Molex

Innovative Automotive Connectivity Solutions ! Molex supports automakers with a proven selection of high-speed, high-reliability and miniaturized automotive connectors. With decades of experience in automotive electronics and innovative connector design, Molex leads with a proven portfolio of high-speed and miniaturized automotive connectors, featuring automation-friendly features and sealing technologies that meet the industry demand for reliability and performance.

Stand 19-20

KERAFOL Keramische Folien

Kerafol Keramische Folien. The family-run company KERAFOl® specializes in thermal management and technical ceramics. Thanks to our decades of experience and state-of-the-art process technology, we develop and manufacture high-quality technical products for various markets. KERAFOl® is the specialist for all aspects of thermal management. With almost 300 employees, we are involved in the development and production of thermal interface materials (KERATHERM®) and thermally conductive injection-molded granules (KERAMOLD®). In line with the motto "KERAFOl® makes electronics cool", KERAFOl® products have been used in electronic assemblies for many years, and the electrification of the drive train in the mobility sector has led to many other new areas of application.

Stand 21-22

CRG Industry Service

We support technological evolution through innovative optimization systems in order to develop as many solutions as possible to improve the production process in as many fields of application as possible. From CAD design, to CAM programming for mold making. CRG uses collaborations with the best professionals in the mold sector, from prototype mold to series production molds for any sector (Automotive, Home Appliances, Electrification, etc.)

Stand 23-24

Anytest Solutions

Electronical testing. We offer our partners decades of experience in product testing. From sub-tasks to turnkey solutions, our aim is to make our customers' everyday work easier. Our mission is to fully serve the quality assurance needs of our manufacturing customers.

Stand 25-26

Binar Electronics

Binar Electronics is a company focused on circuit design and customized solutions. With 5 years of experience in the field, we are a passionate startup specializing in circuit design, providing electronic solutions tailored to the specific needs of our clients. Our services cover the entire process, from the initial concept to the finished product. We ensure efficient circuit assembly, both in prototype variants (10-20 units) and large volumes. We are committed to finding the best solutions, including identifying reliable raw material suppliers. Our mission is to bring innovation to the business environment and consumer experience through electronics, offering our clients exactly what they are looking for and cannot find in the market. With a personalized approach and a commitment to excellence, we are the ideal partner for your electronic projects. As a young company, we understand how crucial it is to keep costs under control. Therefore, we seek to optimize costs without compromising product quality.

Stand 27

Anorom

The Anorom factory based in the Hunedoara Industrial Park has a history of over 20 years in the field of surface treatments for aluminum parts: hard anodizing, decorative anodizing, Surtec 650 chroming. We are ready to serve you impeccably and deliver treated aluminum parts in premium quality exactly when you need it.

Stand 28

Logit

LOGIT is a logistics company engaged in the transportation of whole and groupage shipments between Romania, Bulgaria and Greece. Our company has a diverse fleet and a team of professionals with many years of experience who provide services to all our customers. We have three warehouses – in Bucharest (Romania), Giurgiu (Romania), Sofia (Bulgaria) and Ruse (Bulgaria). Each of them is equipped with everything we need so that we can easily and quickly respond to the needs of our customers.

Stand 29

Keyence International Belgium

As a leading supplier of sensors, measuring systems, laser markers, microscopes, and machine vision systems worldwide, KEYENCE is at the forefront of factory automation. We strive to develop innovative and reliable products to meet the needs of our customers in every manufacturing industry.

Stand 30

DAV Tech

DAV Tech is an Italian company specializing in the design and commercialization of components and systems for industrial precision dispensing. Over the years, DAV Tech has grown and evolved, becoming a supplier to some of the most important companies, both Italian and international, operating in various industrial sectors, including automotive, electronics, mechanics, and home appliances, to name just a few. DAV Tech aims not to be seen merely as a supplier of components but as a partner with whom clients can collaborate to develop any type of application. This relationship begins with preliminary testing, continues through offering solutions, and is realized with the order and project development, extending through necessary support during the post-sales phase. A significant portion of the standard components is designed and developed in-house, with the guarantee of deep customization possibilities that are often not available from other companies in the industry. The offer is completed, when required, with the creation of fully dedicated dosing automation systems, complete with all necessary certifications and markings.

Stand 31

Sartorom Impex

Sartorom is the first laboratory equipment company founded after 1989 with fully Romanian capital and the first supplier of laboratory instruments in Romania to be ISO 9001 certified and ISO 17025 accredited as a calibration lab. We are delivering complete solutions for laboratories in all industries, including research and development, production or quality control. We have developed solid teams in sales, service, calibration laboratory (ISO 17025) and metrological verification. Our team expertise covers areas such as agriculture, food & feed, automotive production, plastics & composites, defense, aviation and aerospace, rolling stock, steel, chemical, pharmaceutical & cosmetics, university, medicine and public health care. We operate at the national level through the Bucharest headquarters and 9 regional centers.

Stand 32

Hamann

Hamann imports and distributes products specific to manufacturing processes, maintenance activities in the industrial sector and those who perform maintenance and repair work for cars, trucks or agricultural machinery.

Stand 33-34

4M MP

+ 25 years experience in plastic injection or blow moulding for automotive and other industries. Our dedication to the quality of the products and services we deliver represents the foundation of our success.

Stand 35-36

Form A Tronic

At Form A Tronic, we combine deep expertise in advanced 3D printing technologies with a strong focus on sustainable industrial manufacturing. We deliver complete solutions tailored to modern production needs — from rapid prototyping and small-series manufacturing to the integration of additive manufacturing into industrial workflows. As the official distributor of Eplus3D metal 3D printers in Romania, we supply state-of-the-art equipment for industrial metal additive manufacturing applications. In addition, we offer a wide range of solutions for polymer and composite materials, covering various additive manufacturing technologies such as SLM, SLS, SLA, and FDM. Beyond equipment sales, Form A Tronic provides fast-track production services, prototyping consultancy, and full project support — enabling companies to reduce lead times, optimize production costs, and accelerate product development cycles.

Stand 37-38

Siskon Software & Automation

Siskon stands out as an emerging engineering firm specializing in manufacturing solutions such as industrial automation and process control, IIoT, traceability solution. Siskon's aim is to furnish customers with cutting-edge technology, delivering quality products and professional integrity for total customer satisfaction. In addition to crafting advanced control equipment and software for the manufacturing sector, Siskon offers comprehensive solutions. These include technical support, project feasibility analysis, equipment selection and sourcing, software application, system installation and ramp, documentation, and on-site training services. Our clientele spans diverse industries, including tobacco, white goods, automotive and food & beverages.

Stand 39-40

Global Source

Global Source is a high level technology equipment and solution provider for all industrial and laboratory requirements. We offer personalized solutions for inspection, measurement, testing requirements, and design and development for technical furniture. Being a supplier of state-of-the-art equipment, the company has a diversified, unique brand portfolio, from top producers such as Hirox, Ash, Inspecto, Motic, Jenoptik, Viking and others. Along with the digital microscopes we are proud to serve successfully in various configurations laboratories and production lines, we also present automatic robotic inspection system, based on Artificial Intelligence and Deep Learning. Our main goal is to offer the most suitable equipment for every application, along with the right training, to have a quick and safe start. We are committed to support our customers, so we offer free demos, trials, efficient remote or on site services. We develop industrial and laboratory products with creative design solutions and expert use and care advice.

Stand 41

Anfaengineering

We are an engineering company providing design and development services for electronic hardware and embedded software. We help bring your product from idea to prototype and into production. Our services includes: - Electronics design: concept, schematic design, PCB layout - Embedded software development (C/C++ for various microcontrollers and microprocessors, Communication Interfaces, Artificial intelligence models) - Rapid prototyping manufacturing - Product testing, validation, and certification assistance Our strengths include broad experience and proven history of successful product development in various fields and we deliver finished products quickly and cost-effectively and offer rapid prototyping solutions.

Stand 49-50

Eurocom Invest

Our technology-oriented company offers professional industrial scanning and 3D printing solutions.

Stand 51-52

Chorus

Chorus Research Engineering Distribution is a company providing complete electrical solutions for energy and automation technologies, with a vast experience in the field and with generous intentions for the future. We are consistent with our objectives: keeping the customer satisfied, the continuing education and the passionate teamwork will bring the change. These principles lay at the basis of our collaboration offer.

Stand 42-44

Lord Industrial Tools

Lord Industrial Tools is a multi-catalog company established in 2007, aiming to bring added value to the Romanian market through high-quality services and products. Our young team, with extensive experience in the INDUSTRIAL sector, provides you with technical and commercial support at the highest quality standards. Thanks to the implemented CRM and ERP systems, the relationship between our company and our clients is always measured by quality and performance standards. Lord Industrial Tools offers a wide range of high-quality products designed for industrial use and beyond, backed by suppliers with extensive experience in the field. Our product range includes industrial furniture, professional work tools, chemical products, cleaning and hand care products, machining services, metal fabrications, industrial flooring, and a broad selection of consumables to support our clients effectively.

Stand 53

Trob Robotics

Our journey, which started in the early 2000s with the goal of being "a reliable business partner in the high-tech transformation that our industries need", is now continue as become reliable brand with more than 400 projects which successfully commissioned in the several industries (automotive industry, white goods, food and air conditioning, general industry etc.) and with our business partners in 12 countries. We offer you turnkey support in the design, production and commissioning of the production technologies you need, with the strength we derive from our expert engineering staff, our extensive knowledge gained from different industries/different processes and our working principles.

Stand 45-47

Multitech Industrial

Multitech - Efficiency on the production line. For more than 14 years, Multitech has been offering equipment and specific solutions to manufacturing industries from the most important global brands in the fields of marking, labeling and industrial automation. Multitech's solutions support and optimize the production processes of hundreds of companies in Romania.

Stand 54-55

InTradeFairs

Intradefairs is an online B2B platform for industrial companies, the organizer in Romania of the Industry Expo, Automotive Expo, Manufacturing Expo, Emsetech Expo, Logistics Expo Technology Expo, Electronics Expo, Robotics Expo and Automation Expo Trade Fairs.

Stand 56

Transilvania Business

Monthly magazine Transilvania Business is the sole premium publication mainly focused on economic activities in Transylvania and Banat – Romania, but also integrates articles about main national investments and projects and also international trends & events.

Stand 48

Allesro

Allesro is an engineering firm expanding into the renewable energy sector with a focus on photovoltaic panel cleaning services. Our new brand, SpalPanouri.ro, specializes in professional, efficient, and eco-friendly cleaning solutions for solar panels, ensuring maximum energy efficiency and longevity of installations. With a strong background in engineering, we leverage advanced techniques and top-quality equipment to deliver superior results for solar farm operators, plant managers, and warehouse owners. Our commitment to sustainability, safety, and customer satisfaction drives us to provide tailored cleaning services that minimize downtime and optimize energy output. By entering the renewable energy market, Allesro aims to become a trusted partner for solar energy providers, helping them improve performance and reduce maintenance costs. Our team is dedicated to delivering reliable, environmentally responsible solutions that support the transition to cleaner, more sustainable energy sources. We are excited to bring our engineering expertise into this growing industry and contribute to the widespread adoption of renewable energy.

Stand 57-60

Telog

Office, warehouse or production facility, the requirements for intralogistics are becoming increasingly complex. By the term "intralogistics", we understand the organization, implementation, and optimization of the internal material flow in industry, commerce, and public institutions, using technical transport and storage systems as well as services. An inherent feature of intralogistics is the interdisciplinary collaboration of providers and experts from various disciplines. TELOG helps you identify and realize optimization and cost reduction potentials for your company in the field of intralogistics. Storage lifts, software, robots, and driverless transport systems (DTS) help to save time, costs, and space sustainably. Goods and materials can be provided faster, more accurately, and with fewer staff through efficient warehouse automation. We have made it our mission to design these facilities to perfectly support the goals of your company.

Curățenia aduce randament maxim.

- Serviciu profesional de curățare a panourilor fotovoltaice.
- Robot de spălare disponibil la vânzare pentru întreținere ori de câte ori dorești.
